DETAILED ACTION

Priority

It is noted that this application appears to claim subject matter disclosed in prior Application No. 10238823.7, filed 23 August 2002. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e) or 120. See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. Also, the current status of all nonprovisional parent applications referenced should be included.

If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim

Art Unit: 2858

filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,384,614 to Hager et al..

Regarding claim 15, Hager et al. disclose two electrode bodies/probes each formed with two electrically separate surfaces positioned to contact simultaneously a sample, the electrode bodies/probes spaced apart in the sample for characterizing the sample in between the two electrode bodies/probes (column 1 lines 45-67, Fig. 1 and 3 elements 12 and 14), an electrical excitation source (42) connected to one of the surfaces of each electrode body for feeding an

electrical signal through sample (16), and a high ohmic electrical potential measuring unit connected to the other of the surfaces of each electrode body for measuring an electrical potential across the sample resulting from application of the electrical excitation signal (column 4 lines 10-30, Fig. 3 element 150).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hager et al. in view of U.S. Patent No. 5,841,282 to Christy et al..

Regarding claim 16, Hager et al. does not disclose electrode spikes driven into the ground, characterizing soil characteristics in between the spikes or three dimensioned tomographic electrical conductivity measurements. Christy et al. disclose a device and method for measuring soil conductivity having a plurality of conductors (Fig. 7 elements 64) inserted into soil wherein the conductors characterize physical soil characteristics/impedance in between the spikes (column 7 lines 1-31) and three dimensional tomographic electrical conductivity measurements/simultaneously measuring soil conductivity of at least two different soil depths in a single pass (abstract). It would have been obvious to one of ordinary skill in the art at the time the invention was made to include measuring soil characteristics as taught by Christy et al. into Hager et al. for the purpose of characterizing topsoil depths and qualities.

Allowable Subject Matter

Claims 9-14 and 17 remain allowed.

Response to Arguments

Applicant's arguments with respect to claims 15 and 16 have been considered but are moot in view of the new ground(s) of rejection.
